Setup

This document serves as a guide to facilitate setup of the code base and environment for a conducive learning experience.

Creating a Repl.it Account
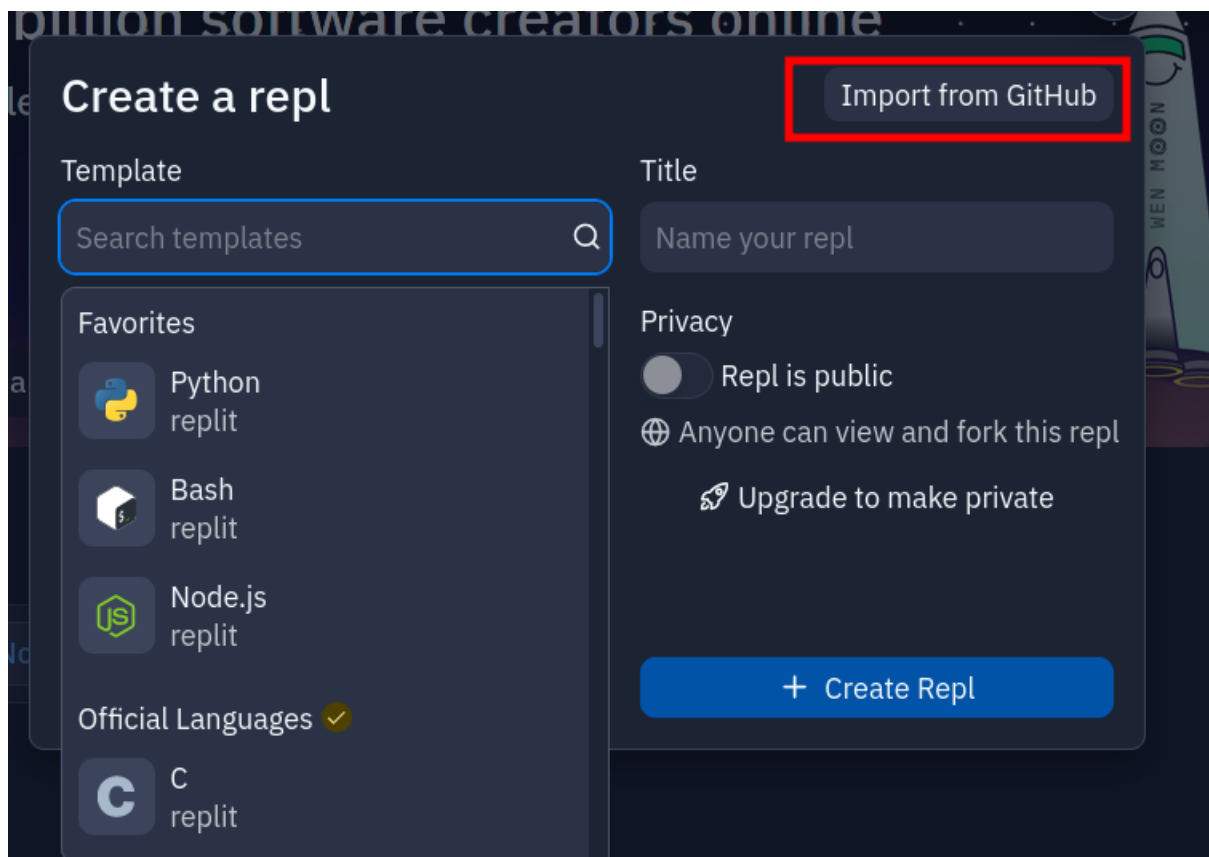

Please proceed to [Replit](#) and create an account if you do not already have one.

Obtaining the code

To obtain the code to kickstart the workshop, start off by **creating a new project**.

Next, select the option to **import from GitHub**

Key in the GitHub link: https://github.com/SMU-DSC/ExploreSCIS-2021 and click on **Create Repl**

You will now see the code and you are ready for the ExploreSCIS workshop.

What's Next?

If you wish to learn more about Flask and Python before the workshop, we recommend some additional reading materials:
